

# Geography Minor: Planning Option

## Why choose the Geography Minor: Planning Option?

1. The planning option gives you a spatial perspective, so that not only can you answer the question of where are things located, but why are these phenomena located where they are and what is their significance.
2. The planning option builds on your understanding of environmental processes and problems that influence planning issues.
3. The planning option expands employment opportunities; its perspectives are used by planners in government, environmental analysts, and non-governmental organizations.

## Categories of Courses (minimum of 18 credits required)
