# Golden Bear Goalkeeper Academy

## WHO ARE WE ...

The Golden Bear Goalkeeper Academy is a small group of experienced goalkeepers and goalkeeper coaches/trainers who have come together to create an environment that not only promotes success, but also gives the goalkeeping community a platform to take their game to the highest level possible.

With a strict commitment to development, the Golden Bear Goalkeeper Academy prides itself on offering the highest quality of training imaginable from coaches who have tremendous experience working with goalkeepers. We assure every goalkeeper, no matter their age or level of experience, an unforgettable experience where your development is the end result.

We are **NOT** a training company!

We are a dedicated group of individuals who have a passion for producing quality goalkeepers and properly promoting the goalkeeping position in the soccer community.

Formerly know as The Goalkeeper Club, our reputation for providing the highest quality camps and clinics comes from our guarantee that no goalkeeper will get lost in the shuffle. Every program we offer has a limited registration policy so we can keep our coach-to-keeper ratio at 1:7 or lower. Limiting our registration for all camps and clinics gives our tremendous staff the opportunity to provide all goalkeepers with individual attention and instruction.

**WELCOME TO A TRUE  
GOALKEEPING COMMUNITY**

## Youth Goalkeepers

Like nothing you have EVER experienced, this program offers age/skill appropriate training in a fun environment with goalkeeper coaches who specialize in the training and development of YOUTH goalkeepers. Each session will focus on one of the most important technical aspects every young goalkeeper needs to properly progress in their development.

*We guarantee you will not only have fun, but you will develop into a better goalkeeper while learning the techniques needed to make great saves and prevent injury!*

## Advanced Goalkeepers

This summer camp program will greatly exceed your expectations! Although you will cover various technical skills, advanced goalkeepers will be exposed to training methods used by coaches at the college, professional and national team levels. Focusing our attention on fine tuning technical skills, while introducing the tactical elements every goalkeeper faces in match conditions, makes this program the most comprehensive available!
