

MICRO-INTERNSHIP PROGRAM

Website Creation for Local Band/Musician

Musician's Name: Peter Rodenberg

Project Description:

1. A website for my music. I currently play in one band and record albums with another. These 2 groups would be the primary focus with the latter taking the forefront.
2. There needs to be information on each band and a place to add news - setlists, performances, album releases, press releases, articles, etc.
3. I'd like a section for past musical projects that I've been a part of with previous bands - link up with archived live performances, albums, brief write up on my thoughts and experiences, tour posters, etc.
4. I will need an SOP for myself, or future web designers to update the site and/or add upcoming performances
5. Students will gain experience in creating a website, archiving, meeting deadlines, collaborating, designing, creating Standard Operating Procedures

Preferred Skills: Web Design & Graphic Design

Approximate Length: Approx. 25 hours

Format: Remote

Payment: Direct Pay from employer
