MICRO-INTERNSHIP PROGRAM

Wilby LLC Web Builder

Project Description:

1. Designing and developing a curated, human-first digital marketplace dedicated exclusively to independent artisans, fine artists, and taste-maker curators—strictly eliminating dropshipping, mass production, and AI-generated content to celebrate authentic handmade quality.
2. Working directly with the founder you will help build the platform from the ground up by wireframing responsive mobile and desktop layouts in Figma, customizing frontend templates, structuring backend databases for artisan applications and product catalogs, and conducting cross-browser QA testing.

Preferred Skills: Candidates should be pursuing or hold a degree in Web Development, Computer Science, Graphic Design, or a related field

1. Strong fundamentals in HTML, CSS, JavaScript, and Figma.
2. Proficiency in modern CMS platforms like Webflow, Shopify, or React-based frameworks is strongly preferred,
3. An eye for responsive UI/UX design.
4. Demonstrate a passion for human-centered design and a strong commitment to supporting independent artists and artisans.

Approximate Length: Approximately 20-30 hours during the Fall semester (Sept-Dec); Winter Break (Dec-Jan)

Format: Remote (preferred)

Payment: Upon completion of the micro-internship, a $250 stipend will be released to the student

Contact Information: To apply, please submit your resume, a link to your portfolio or GitHub showcasing past web projects, and a brief statement (150–250 words) explaining your interest in building a human-centered artisan marketplace to hello@wilbymarket.com with the subject line Web Intern Application – [Your Full Name]
