Dr. Eric D. Carter
Macalester College

Covid-19 and Medical Geography
Past, Present, and Future

Wednesday, November 18, 2020, 7:00 p.m.

A Remote Keynote Lecture on Zoom / Meeting ID: 993 8204 2699

Eric D. Carter is the Edens Associate Professor of Geography and Global Health at Macalester College. His interdisciplinary research lies at the nexus between medical geography, environmental history, and the history of public health, with a regional focus on Latin America. His published work has covered an array of topics, including historical-geographical aspects of malaria control in Argentina and in the Tennessee Valley; the influence of neoliberalism on health promotion projects in the US; environmental justice politics in Latino communities of Los Angeles; and community attitudes towards dengue fever control in Ecuador.

Dr. Carter’s work has been published in such journals as the Annals of the Association of American Geographers, Social Science and Medicine, The Professional Geographer, Geoforum, Journal of Historical Geography, Local Environment, Social Science and Medicine, and Health and Place. His book Enemy in the Blood: Malaria, Environment, and Development in Argentina (2012) was awarded the prize for best book in Latin American environmental history by the Conference on Latin American History. He is currently writing a new book on the history of social medicine in Latin America.

Persons with a disability, who need accommodations for this event, should notify the Disability Services Office two weeks prior to the event at 610-683-4108 or email accommodation@kutztown.edu, TDD number: 610-683-4499, in order to discuss accommodations.
