## Configuring BearNet Secure on Mac OS

(This configuration will register your device to BearNet Secure for 1 year)

** If you already have BearNet access, you may go directly to Step 3.

1. **Go into your Wi-Fi and check BearNet**

2. **Open Safari and navigate to disney.com to get the log in page and sign in. Note: do not use full email address, just part up to @, example ksmit555**

3. **Go to Safari (must be used) and type securewifi.kutztown.edu**

4. **Please refer to the instructions per your OS. Join Now**

You are about to configure your device to access Kutztown University's secure Wi-Fi network. Please follow the directions linked below to get connected.

Windows Mac OS X iOS Android

The following system was detected:

Mac OS X El Capitan

Choose Option:
- Configure via dissolvable Agent (configure and connect)
- Configure Profile Only (configure only)

JoinNow

By clicking the JoinNow button you accept the following terms and conditions.

Was your device detected incorrectly?

Select your device: Mac OS X El Capitan

---

Downloading application...
Your system will download and mount the DMG.
When finished open Finder and run the mounted "SecureW2 JoinNow" application.

Back

5. **Run the DMG file**

6. Click Open

7. **Put in Username **not full email address**/Password**
8. **Click Next**

9. **Click Done**

Go into your devices WiFi settings to verify that BearNet Secure is selected.
