Conversation starters for lunch discussions

• Share your idea for collaboration with those at your table. What suggestions can you give each other to build on that idea to make it better?

• How can you create the biggest impact on student learning with these co-curricular/curricular ideas?

• What would have to change at KU to implement your idea? What would stimulate that change?

• What existing resources at KU have you not thought about connecting to general education that might be useful in this enterprise?

• How can you get students excited about your ideas?
