**Drug Facts**

**Active ingredient (in each tablet)**
- Ibuprofen 200 mg (NSAID) 

**Purpose**
- Pain reliever/fever reducer

**Uses**
- Temporarily relieves minor aches and pains associated with:
  - Headache
  - Toothache
  - Backache
  - Minor arthritis pain
  - Menstrual cramps

- Temporarily reduces fever.

**Warnings**
- Allergy alert: ibuprofen may cause a severe allergic reaction, especially in people allergic to aspirin. Symptoms may include:
  - Hives
  - Rash
  - Facial swelling
  - Hives (wheezing)
- Stop use and ask a doctor if you experience any of the following signs of stomach bleeding:
  - Foul stool
  - Vomiting blood
  - Have bloody or black stools
  - Have stomach pain that does not get better
  - Pain gets worse or lasts for more than 10 days
  - Fever gets worse or lasts for more than 3 days
  - Nausea or vomiting is present in the painful area
  - Any new or unexpected symptoms occur

- If pregnant or breast-feeding, ask a health professional before use. It is especially important not to use ibuprofen during the last 3 months of pregnancy unless specifically directed to do so by a doctor because it may cause problems in the unborn child or complications during delivery.

**Do not use**
- If you have ever had an allergic reaction to any other pain reliever/fever reducer
- Right before or after heart surgery

**Ask a doctor before use if**
- Stomach bleeding warning applies to you
- You have a history of stomach problems such as heartburn
- You have high blood pressure, heart disease, liver diseases, or kidney disease
- You are taking a diuretic
- You have problems or serious side effects from taking pain relievers or fever reducers
- You have asthma

**Ask a doctor or pharmacist before use if you are**
- Taking aspirin for heart attack or stroke, because ibuprofen may decrease this benefit of aspirin
- Taking any other drug
- Under a doctor’s care for any serious condition

**Drug Facts (continued)**

**When using this product**
- The risk of heart attack or stroke may increase if you use more than directed or longer than directed.
- Take with food or milk if stomach upset occurs.

**Directions**
- Do not use more than directed.
- The smallest effective dose should be used.
- Do not take longer than 10 days, unless directed by a doctor (see Warnings).
- Adults and children (12 years and older):
