# Study Tips From The Academic Affairs Commitee

## Elizabeth

I love studying in the Old Main concourse whenever I have time in between classes and even early in the morning. With its ornate woodwork, arches, and fireplaces, the concourse gives me the feel of a dignified, antique office space. If I'm not studying at one of the tables, you can see me relaxing in the room's sitting area in the evening as Old Main's night classes go on

## Ciara

When projects or exams come up, I study at the library in the silent area so I can focus with no distractions. I study during free hour and in the evening. Always give yourself a week or a few days to study or work on a project.

## Isaiah

I love studying in Old Main on the 3rd floor near the social work area . The best time I like to study is at night I feel at night I am able to get more work done. Normally I like to study where there is food around me or a vending machine. Food helps me stay focused. I also normally would bring a friend with me so it is like we are both doing school work.

## Hailey

I love studying in the SGB office because it is quiet and it is a nice space to get work done at. The SGB office is contaian a relaxing yet productive atmosphere.
