To: University Senate  
From: Patricia Derr, Chair  
General Education Committee (GEC)

As provided for in the original model for General Education, the GEC is responsible to making changes and improvements to the current General Education Model. We are soliciting comments and feedback from all the stakeholders who approved the original plan. I, or a member of my committee, will be speaking (or more appropriately listening) at APSCUF Rep Council and Chairnet as well as Senate. The General Education website has been fully integrated into the KU website, and all the information about the current model is provided there.

Our focus this year is on the University Core, the University Distribution, and the Competencies. The GEC welcomes your suggestions and feedback. To help us prioritize suggestions, I ask that you rank your comments. If you could only change ONE thing about General Education, what would it be? Nothing is off the table. The GEC will be meeting regularly this semester to improve the model and our hope is to work for consensus among the faculty to make General Education work better for our students.
